Operator is requesting variance to Rules 1003, interim reclamation, and 1004, back-filling pits with soils to their original relative positions. It is at the request of the landowner that a depression will remain for wildlife and livestock shelter and opening for water.

The pit will be recontoured to a depression with an access ramp of 4:1 or 5:1 slope on one side of the depression to allow easier access for livestock and or wildlife. Remaining sides of the depression will be broken down to give a slight slope of 2:1 or 3:1.
