John

We are progressing and finishing up our sampling . I hope to be able to transmit all the forms and fulfill our requirements in the near term. Hopefully before nov.
I can call next. Wk. And give a new update. Thanks Gene

Subject: Gebauer #1 NOAV #200273766 Update Request

Gene,

Please provide an update regarding the corrective actions being performed at the Gebauer #1. When we met in May earlier this year a revised schedule of August 31, 2011, was established to meet the corrective actions. I stopped by the location on August 18, 2011, and it was evident that some of the site work had been performed. COGCC still requires the following information:

- Form 27 with soil sample results to verify all impacted material was removed from the pit complex;
- Form 27 needs to include soil disposal documentation for any oily waste removed from the pits;
- Form 15 to document pit upgrades to a lined facility;
- Form 2A

A copy of the most recent inspection is attached for your records.
Thank you,

John Axelson, P.G.
