Wildlife BMPs:

BMP Type	Comment
PROPOSED BMPs	<p>State #4</p> <p>SESW Section 36, T4S, R58W</p> <p>Arapahoe County, Colorado</p> <p>Stormwater Management & Proposed BMP's</p> <p>Renegade Oil & Gas Company, LLC (Renegade) has in place stormwater Management Plans for both construction and post - construction activities that ensure compliance with both the Colorado Department of Public Health and Environment (CDPHE) and Colorado Oil & Gas Conservation Commission (COGCC) requirements.</p> <p>The plans provide for various sediment control BMP's that are applied on a site specific basis. These BMP's include fiber rolls, silt fences, straw bales, berms, dams, ditches, culverts, mulching, revegetation, etc. Not all BMP's will be used at each construction site. Renegade, and its consultants, attempt to use BMP's that minimize surface disturbance and adverse environmental impacts.</p> <p>The site for the State #4 well is a gently sloping, untilled, implanted farm field that is in wheat stubble. Renegade will construct a drill site by moving and segregating the topsoil on the exterior of the drill site. We will then level and berm the entire site, thus providing containment for the entire site, and facilitate interim reclamation by recountouring and then returning the topsoil to the drill site.</p>
