**Subject:** Schlotthauer 4-26 Form 2A 400222294 - Bayswater Exploration and Production LLC

Kallasandra,

I am reviewing the Form 2A location assessment (Doc #400222294) for the Schlotthauer 4-26 location in the SWSW Sec23 T7N R67W, Weld County and have the following comments or questions:

- 1. Facilities:** Based on the Form 2 APDs submitted and the multi-well plan attached, it appears the location is a multi-well pad with production facilities. The submitted Form 2A only includes 1 well and no production facilities. Please provide a list of the planned facilities for this location and I will update the Form 2A. **That's odd... The facilities are:**
  - Wells: 4
  - Oil tanks: 3
  - Water tanks: 1

Separator: 1

VOC Combustor: 1

2. **Water Resources:** The location is in a sensitive area due to the presence of shallow ground water and permeable subsurface material. Therefore, I have changed the sensitive area designation to Yes. **That is fine.**
3. **Drilling Pit:** The Form 2A indicates a drilling pit will be used. Please clarify if the location will be drilled with closed loop or a pit. COGCC would prefer Bayswater use a pit at this location. **The pit is inaccurate, Bayswater will be using a closed loop system.**

Please contact me with any questions.

Best Regards,

Rick Allison, P.G.
