Form 2 #400215642  
Form 2A #400215660

Loni,

In reviewing these forms, I have several questions. I can make changes based on your approval where appropriate. Please call if you need more information.

1. The proposed depth of the well is 2520 feet, therefore Rule 318.a applies. The location can be no closer than 600 feet from the lease line, and 1200 feet from the nearest well. In this case the lease line is 408 feet away, and the nearest permitted well is the Hagemann 43-13. Please advise. [Please change TD to 2499](#)
2. The Hagemann appears to be 1103 feet away, not 1169. Please verify. [Yes I agree with 1103](#)
3. The nearest building appears to be closer than 2,725 as reported. Please verify. [Yes I agree nearest bldg may be around 1,800.](#)
