States that while drilling the surface casing hole, the bore hole veered into an adjacent well's surface casing, 05-045-020676, at a depth of 1419'. He requested and received verbal approval to plug the 045-20665 well by filling the surface hole from 1419' to surface with neat cement.

He was instructed to follow up with a form 6 – Subsequent and a form 5 – Drilling and Completion Report. Also, if he want to replace the well a new form 2 would be required.
