**Subject:** Hergert Well Locations and Facility Form 2As 400220660, 400220935, 400221034, 400221045

Kallasandra,

I am reviewing the Form 2A location assessments (Doc #s 400220660, 400220935, 400221034, 400221045) for the Hergert 1-35, 8-35 and 17-35 well locations and the Hergert 1-35 Facility location in the NE ¼ Sec35 T7N R66W, Weld County and have the following comments.

1. I have changed the Sensitive Area Designation to Yes because shallow ground water is present. Since closed loop drilling will be used and no pits are requested on the location, no additional conditions are attached relative to shallow ground water protection. **This is fine**
2. Please submit a revised Waste Management Plan per our previous discussions. **Submitted previously**

3. Ground water is reportedly 6 feet in the area of the proposed wells and facility. How will Bayswater construct the tank battery at the Hergert 1-35 Facility location to prevent spilled or released fluids from impacting the shallow unconfined aquifer? [See email dated 11/24/2011 regarding BMP.](#)

Please contact me with any questions regarding these Form 2As.

Best Regards,

Rick Allison, P.G.
