The elevation of the derrick floor above sea level is 5429 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to deepen this well from the original TD of 6,572' (-1143) 440 feet to 7,012' (-1583), a total Weber penetration of 500', as part of the north central peripheral water flood project.

 Approved 3-4-59  
G. D. Frazier  
 District Engineer
