

SE Bayfield 34-7 #12-3A  
Location Drawing

The red circle is a 500' radius around the well head. Since the edge of the pad is about 100' from the well head, this gives a 400' circle around the location. The only improvements within 400' of the location are irrigation ditches (a cemented one south of the location and a dirt lateral ditch north of the location) and an unimproved dirt path/road, in the far west edge of the red circle, that is used by the landowner with a four wheeler and livestock.
