Compliance Summary:

QtrQtr: SWNW Sec: 16 Twp: 3N Range: 66W

Inspector Comment:

Routine inspection of API# 05-123-30627 COLAND 41-17. Wellhead sign is pushed over and leaning on delicate wellhead equipment. Sign should be straightened to prevent damage to wellhead equipment. Weeds are collecting on fence and need to be cleaned up.

Form 2A COAs:**Wildlife BMPs:**

BMP Type	Comment
PROPOSED BMPs	<p>Anadarko Petroleum Corporation</p> <p>Stormwater Management Program .i</p> <p>Anadarko has prepared two stormwater management plan ensure our compliance with COGCC and CDPHE stormwater management requirements. The CDPHE stormwater management plan covers construction activities while the COGCC plan covers post construction activities. In order to be in compliance with the stormwater regulations, it is necessary for sediment containment systems to be utilized at our sites. Sediment containment systems consist of best management practices (BMP's) such as silt fencing, straw bales, erosion control blankets, continuous berms etc. A combination of BMP's may be used at any given site. Anadarko strives to use BMP's that are least intrusive, yet provide the required sediment control and surface water protection. The sediment controls used are determined at the time of construction. Copies of both stormwater management plans are kept at our field office in Evans and our region office in Denver along with a copy at the Colorado Oil and Gas Conservation Commission and are available for inspection.</p>
