Sarah,

I checked with our District Wildlife Manager who said the roost was active last year. In that case, we would consider it active. I will enter the bmps on eform.

Thank you, Celia. I was just checking. I assume you and Arthur are working together on this. So I'll just keep checking for your review status to be moved to pass.

Thanks,

Sarah Freeman

Hi Sarah,

I have observed this site once and have seen no evidence of roosting eagles, although I did see a red-tailed hawk come in to night roost. The small stand of trees is adjacent to a fairly busy road. It

is possible that the site was used as a roost before the Seeley subdivisions built out. However, I would like to go out once more to more or less confirm that the eagles are not there.

Hi Celia,
This location falls partially within an Eagle SWH area. Do you want to make a comment on the form? If not, could you change the status on your part in the review to pass so that we can move the permit on?
Thanks very much,

Sarah Freeman
