RE: Rule 318A(I).a & 318A(I).c Exception Location Waiver

SWD #C4B Well: 1040' FSL, 1924' FEL, Sec. 26 T6N R65W

Dear Mr. Neslin,

High Sierra Water Services, LLC (HSWS) respectfully requests that the Director grant an exception to Rules 318A(I).a and 318A(I).c for the above well. This well is spotted as above, on a single site and in accordance with the wishes of the surface owner, in order to maximize future land use possibilities and minimize surface disturbance. Per COGCC Rule 318A(I).a, a GWA well surface location must be within a 400' by 400' drilling window centered at the center of each quarter-quarter section, or inside a 800' by 800' drilling window centered at the center of each quarter section, or per rule 318A(I).c shall not be less than 50' from an existing well. These well surface locations fall outside of the prescribed 400' by 400' drilling window centered at the center of each quarter-quarter section, or outside the 800' by 800' drilling window centered at the center of each quarter section and are not located within 50' of an existing well.

A wavier from the affected surface owner is attached.

Sincerely,

A handwritten signature in blue ink, appearing to read "Clayton L. Doke", is written over a light blue circular stamp that is partially obscured by the signature.
