Okay – I finally received the list of offset lease holders for the Emerald wells.
I have attached the bottom hole exception request for Emerald 96x along with some of the attachments – the attachment is too big if I put copies of the waiver letters. I will put a full copy in the mail to your attention.
I should have the other three wells done by the end of the day.

Subject: APD'S FOR EMERALD 97X, 98X, 95X, AND 96W

Good Afternoon, Diane,

I have reviewed the above listed APD's in Rangely Field and would like to request waiver letters like the ones submitted a year ago for the 93X and 94X. Since the BHL's for all four wells are about 300' from the unit boundaries, they do not meet the statewide spacing rules of 600' from a mineral

lease line. Since the acreage just outside the unit boundaries is unspaced, these locations must meet the statewide spacing rules.

Also, for the injection well, Emerald 98X, have you submitted FORMS 31 & 33 to Denise Onyskiw, our UIC supervisor? I didn't see a comment on the APD regarding this.

Thanks,
