Date: Saturday, March 24, 2012 9:16:28 AM

Brandon & Brian,

Based on review of the information submitted, COGCC approves the closure request and no further action is required at this time. The spill report (tracking #200344219) has been changed to closed status in COGIS.
Thank you,

John,
Attached please find a Form 19 / NFA request and supporting documentation for activities associated with a release at the above referenced subject site located in the NWNW Section 5-T7N-R67W. Soil was impacted at the site from an oil dumlplne release. Approximately 295 cubic yards of impacted soil were removed from the site and transported to a licensed disposal facility. Confirmation soil samples were collected from the excavation and analytical results indicate concentrations are below the Table 910-1 Concentration Levels.

Based on soil concentrations being in compliance with Table 910-1 standards, PDC is requesting a No Further Action determination for this site.

Please call Brandon Bruns at 303-831-3971 if you have any questions regarding this site.

Thanks,
Brian

Brian Dodek, P.G.
