Arthur,

NRG consents and agrees to the change in the surface water to 240 feet south east. Thanks,

Brian

Brian,

The COGCC is reviewing the Form 2A (#400253353) for the Natural Resources Group Largo 2 location, located in the SWSE Sec 4 T34S R62W Las Animas County, Colorado. The COGCC requests additional information prior to passing the Oil and Gas Location Assessment (OGLA).

Distance to surface water

A review of aerial photos and topographic map available on the COGCC website indicate that there is a small intermittent drainage located approximately 240 feet south east. The distance to surface water is required to be amended to 240 feet prior to passing the 2A process.

Please feel free to contact me if you have any questions or concerns.

Arthur
