Subject: FW: Jolley KP 43-21 - Request to defer CBL

Mark: let me know if you can deal with this (and at least one more to come).

I think you've done this sort of thing before – we print out the “sent” email and laser/fiche enter it as a document (“Correspondence”) into the wellfile.

And, of course, notify the operator rep (Matt, in this case).

Regards

Jay K

Subject: Jolley KP 43-21 - Request to defer CBL

Afternoon, Kevin:

WPX Energy Rocky Mountain, LLC requests a CBL deferment on the Jolley KP 43-21, located in the NENE of Section 28, T6S-R91W. Attached is a temperature survey that was performed after cementing the 4 ½” production casing on the subject well. Also, attached is a bradenhead pressure summary for your review.

Information pertaining to the request is as follows:

Well:	Jolley KP 43-21
API:	05-045-20706-00
Location:	NENE, Section 28, T6S-R91W
Surface Csg:	9 5/8” set and cemented at 1,478’
Production Csg Cement Date:	4 ½” @ 9,021 – cemented 03/25/2012
Cement:	1,640 sks
Cement top from survey:	3,400’ (Estimated)
Estimated top of gas:	6,258’

Temp Survey: Attached
Volume to fill annular: Hole remained full following cementing operations

Please let me know if you need additional information to approve this deferment. After deferment is received, Williams will continue to monitor the bradenhead pressure until CBL is run and notify if pressure exceeds 150 psig.

Thank you,

Matt
