15. Comments:

Closest Water well permit #: 574-AD Water well with ground water depth permit #: 12324-F A closed loop system will be used for all production casing drilling. However, a pre spud rig may be utilized to drill and set surface casing. This rig is not capable of using a closed loop system. Therefore, two small working pits will be required to capture the cuttings and fluids. If a working pit is used on a PAD located within a sensitive area as marked on the 2A, the pits will be lined with 16M liner.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
