RE: Sagebrush #1 Workover

Dear Thom:

I would like to request expedited handling of the Sagebrush #1 workover request due to circumstances beyond our control. We had a workover rig become available at the last moment and would like to utilize them. The Sagebrush #1 is marginally economic; it is on the Ute Mountain Ute Tribe Reservation and is very isolated. We have waited three months in the past for a workover rig and we would greatly appreciate your cooperation with this request.

I am new to working in the Colorado area and am not familiar with the time period required to obtain approval. In Oklahoma and Texas it is a very quick process, and in the future I will allow more time. We have approval from the BLM and do not forecast any delays other than approval in Colorado. The rig is available the first of next week, and we would be thankful for anything you can do to expedite this process.

Sincerely,

Mike Blackburn
Engineer
