Subject: RE: Jolley KP 523-8 - Request to defer CBL (045-20997)

Matt:

WPX can defer the CBL on this well.

Starting next week, Mr. King should be in the Denver office, and we'll discuss WHO should be the primary point of contract in regards CBL deferment requests. In the meantime, continue to email both of us.

Regards,

Jay Krabacher

Subject: Jolley KP 523-8 - Request to defer CBL

Morning, Kevin, Dave, and Jay:

WPX Energy Rocky Mountain, LLC requests a CBL deferment on the Jolley KP 523-8 located in the SESW of Section 8, T6S-R91W. Attached is a temperature survey that was performed after cementing the 4 1/2" production casing on the subject well. Also, attached is a bradenhead pressure summary.

Information pertaining to the request is as follows:

Well: Jolley KP 523-8
API: 05-045-20997-00
Location: SESW, Section 8, T6S-R91W
Surface Csg: 9 5/8" set and cemented at 1,305'
Production Csg Cement Date: 4 1/2" @ 7,487' – cemented 04/21/2012
Cement: 1,111 sks
Cement top from survey: 2,850' (Estimated)
Estimated top of gas: 4,538'
Temp Survey: Attached
Volume to fill annular: Hole remained full following cementing operations

Please let me know if you need additional information to approve this deferment. After deferment is received, WPX will continue to monitor the bradenhead pressure until CBL is run and notify if pressure exceeds 150 psig.

Thank you,

Matt

Matt Barber
