Subject: Loudder 2-X NOAV #200350687 Transmittal

Dana,

I performed follow up inspections with Diana Burn yesterday at some of the Beren wells in Washington County. Very few of the corrective actions that were required by March 2nd at the Loudder 2-X (API 121-09042) had been completed. As a result, COGCC has issued the attached NOAV for the remaining corrective actions as well as several environmental issues. Also attached is a separate pdf with the full text of the NOAV for reference. I will provide the original at the meeting planned this Friday to discuss the AOC for the Cook Battery. I will also provide a copy of the inspection at that time. If you have any questions about this NOAV we can discuss them after the meeting or give me a call at your convenience.

Ongoing violations at the Loudder will result in another AOC if Beren does not perform and document the required corrective actions by the due date.

Thank you,

John Axelson, P.G.
