Hi. Greg. From my side as a property owner I don't have any problem with the relocating of handke # 4 thanks for letting me know

Mr. Ricardo Bejarano,

Overland Resources LLC is currently drilling the permitted well, Handke #3, API 05-001-09744, and is seeking approval to relocate only the surface location of the permitted well, Handke #4, API 05-001-09745, to a surface location 20' south of the Handke #3 surface location. The Handke #4 bottom-hole location remains as permitted. Overland Resources LLC is requesting your approval of this change and simply needs a response to this email indicating your approval.

The sharing of the Handke #3 well pad location with the Handke #4 will significantly reduce interim and final surface disturbance and requirements for the Handke #4. The sharing of Handke #3 well access with the Handke #4 will eliminate approximately 1/4 mile of new access road and reduce the surface disturbance from 2 pads to one.

Thank you for your consideration.

Best,  
-Gregory
