Subject: Dunn 1-13H Spill Tracking #2229048
Date: Monday, June 11, 2012 4:09:44 PM

Stacy,

COGCC has assigned spill tracking #2229048 to the release at the subject site. Please reference the tracking number on all future correspondence related to this cleanup. If there is stained soil remaining off location that you intend to treat in place, you will need to submit a Form 27 with a specific plan for land treatment in accordance with Rule 907.e.(2). The plan should include sampling and analysis to determine current contaminant concentrations and to verify compliance with Table 910-1 standards after treatment is complete. Also, please send disposal documentation for the material that was taken to Buffalo Ridge Landfill.

In the future, you can send Form 19s directly to me for areas in Weld County between T-5-N and the WY state line and to Bob Chesson for anything in T-4-N and south. Please give me a call if you have any questions.

Thank you,

John Axelson, P.G.
