Subject: Request to use contaminated soil: Dubois Tank Battery and Dubois #5 Location API# 05-075-09326 NENW Sec 7 T9N R52W
Date: Wednesday, June 20, 2012 12:18:19 PM

Dubois Tank Battery and Dubois #5 Location API# 05-075-09326 NENW Sec 7 T9N R52W

COGCC has reviewed your March 30, 2012 request to use 15 cubic yards of contaminated soil at the referenced facility to build up containment dikes. This request is not approved, as TPH levels exceed Table 910-1 maximum allowable concentrations for soil.

Immediately submit a Form 19 documenting the spill which occurred May 31, 2011. In the Form 19 (or in a Form 27, in addition to the Form 19), document a plan to properly treat the contaminated soil per Rule 907.e.(2). Additional confirmation soil sampling will be required to verify that the soils meet Rule 910-1 concentrations prior to reuse. Alternatively, the 15 cubic yards of soil may be properly disposed of at an approved facility; copies of the soil disposal manifests must be submitted.

Please call John Axelson at 303.637-7178 if you have questions.
