Colorado Oil and Gas Conservation Commission (COGCC) Rule 204 provides for access to all lands in the state for the purpose of inspecting oil or gas wells.

204. GENERAL FUNCTIONS OF DIRECTOR

The Director and the authorized deputies shall also have the right at all reasonable times to go upon and inspect any oil or gas properties, disposal facilities, or transporters facilities and wells for the purpose of making any investigation or tests to ascertain whether the provisions of the Act or these rules or any special field rules are being complied with, and shall report any violation thereof to the Commission.

However, COGCC is providing this notice as a courtesy to you, considering that lands near the Town of Ridgway are not active oil or gas producing areas.

We intend to inspect the King #2 (API No. 05-091-05066) well location to verify the current well status during the afternoon of Monday, October 17, 2011.

September 28, 2011

According to COGCC's records, the King #2 well was drilled and completed in 1948 to a total depth of 735 feet, and the current status is listed as producing (PR), although there are no production records on file with COGCC.

If you have any knowledge related to the current status of the King #2 well, if you have a preferred route for accessing your property to inspect the King #2 well, or if you no longer own this property, then please contact me at your earliest convenience prior to Monday, October 17, 2011. My business card is enclosed.

Sincerely,

A handwritten signature in cursive script that reads "David D. Andrews".
