Drilling/Completion  
Operations

BBC GENERAL PRACTICES  
NOTIFICATIONS

- Proper notifications required by COGCC regulations or policy memos will be adhered to
- TRENCHES/PITS/TEMPORARY FRAC TANKS
- Unlined pits will not be constructed on fill material.
  - Drill cuttings from the wellbore will be directed into a lined and bermed surface containment. Any free liquids accumulated in the containment would be removed as soon as practicable.
  - Flowback and stimulation fluids from the wells being completed will be sent to tanks and/or filters to allow the sand to settle out before the fluids are hauled to a state approved disposal facility.
  - Temporary frac tanks installed on location will have proper secondary containment according to SPCC regulations such as either putting a perimeter berm around location or around the frac tanks.

Comment	User	Date
Nabors Rig M-37 Talked to Curtis about erosion control told him he needed covers over drilling mud and gel and oil containment needs to be buried with liners inside burn @ reminded they are in rattle snake city here on the ranch. I will be back to check on them in a few days.	MontoyaJ	07/13/2012
