Gage:

Encana can defer the CBL on this well.
(Any chance of getting Weatherford to also present the temp log in a one-page format? – Granted, even I could deduce the TOC from this particular log.)

Regards,

Jay Krabacher

Subject: CBL Deferment

EnCana CBL Deferment Request

Well Name:	MCU 16-13B
API Number:	05-045-20586
Pad Name:	M16W
Plug Bump Date:	8/2/12
Plug Bump Time:	7:22 AM
Top of Gas:	7904' MD
Designed TOC:	5682' MD
Temp Log TOC:	4825' MD

Bradenhead Pressure Report

Time	Bradenhead Pressure
6 hours	0
12 hours	0
24 hours	0
48 hours	0
72 hours	0

Comments:

Well was cemented with no issues. Temp log was ran in lieu of CBL. Bradenhead pressure will continue to be monitored until rig is off of the pad, at which time a CBL will be run. Annulus was remaining full and static for 4 hrs before setting slips.
