Subject: RE: Jolley KP 514-9 - Request to Defer CBL

Greetings, Matt:

WPX can defer the CBL on this well.

A couple notes: I thought the TOC was a bit lower, say 2350'. I know that the data you submitted is impeccable, but the temp log would come across as a bit more 'valid' if it had a header or other information identifying which well it was from, date logged, etc.

Regards,

Jay Krabacher
