**Walker O Pit Closure, SWSE 18 T8N R57W, API 05-123-05558, Remediation Project #7271**

Mr. Julander,

Based on review of information in the Form 27 you submitted on September 8, 2012, it appears that no further action is necessary at this time, and COGCC approves of closure for this remediation project. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. The remediation number (7271) has been changed to closed status in the Colorado Oil & Gas Information System. Please submit copies of manifests for the impacted soil disposed of at the Ault Landfill by September 28, 2012, referring to remediation number 7271. Please maintain a copy of this email as verification of closure.

Thank you,

Annie
