Elevation Correction

05-123-11567
K P KAUFFMAN COMPANY INC – 46290
SPADE #1-12
SENW 18 5N 67W 6 PM

Review of the data for this well has uncovered an error in the listed elevation for this well. The 1983 survey plat for this well lists the elevation for this location as 4984.5'. The well logs also list this elevation. The offset well 1204' to the west (123-11497) has a surface elevation of 4922'. Both wells are within a flat plowed field with circular irrigation and an irrigation ditch cutting through it. On the topo sheet this ditch has an elevation of 4924' at the west section line 1926' west of this well. The survey would appear to be in error and the elevation is changed to 4922' in the database as a more correct approximation.
