Subject: Reduction of Sampling Frequency for Marty Miller Water Wells
COGCC Project # 2059

Dear Ms. O'Rourke:

Under the subject COGCC project, Bill Barrett Corporation (BBC) has been collecting water samples on a monthly basis since December, 2009 from two water wells owned by Mr. Marty Miller. All results collected to date are provided in the attached spreadsheet.

The laboratory data indicates that there has been little change in the water quality from either the domestic or irrigation wells over the past several months. As a result, BBC is planning to reduce the frequency for sampling the domestic well to semi-annually (approximately July and December) and the irrigation well to annually (approximately December). If at any time the results from the samples collected indicate a significant change in water quality, BBC would contact the COGCC to discuss revising the sampling frequency.

If you have any questions, please contact me at 970-314-9873.

Sincerely,

A handwritten signature in black ink, appearing to read 'Doug Dennison', is written over a light gray rectangular background.
