Greg/Rob,

Attached are two files. One is the new access road map which we would like to formally swap out with the old access road map we previously submitted. The second just has both the new and old access road maps side by side for your review.

The big difference is that all of these wells will now be accessed from the north using WCR 22. So all wells will first use the red/white road outlined in the map and then split off and use either the blue/white road or the green roads. The green roads are the Hudson roads.

You can see we will avoid the I76 and 52 intersection which was a big concern the Town Manager brought up.

Let me know if you have any other questions or issues with this and whether you need anything else from me or Cheryl to finalize this APD.

As you can see we really took the Town of Hudson's concerns seriously and made changes to address those concerns.

Thanks for your help and time.
