Re: Surface Damages  
Gaims – Guerrero 22-15 Well  
T11N-R54W  
Section 15: NENW

Dear Mr. Stieb:

Pursuant to our Surface Use Agreement dated October 23, 2012, please find enclosed SingleTree Resource's check in the amount of [REDACTED] which represents the surface damage payment due for the drilling of the captioned well. We will enter this well site from Logan County Road 70. From this point the distance to the well site will be 1100 feet. We use a 16-foot road width to determine the number of acres used for the road access. These figures show the amount of damage will be 0.41 acres. As there are always occasions where the actual road may cause additional damages during drilling we are sending a check for a full 1.5 acres, which is nearly three times the amount that will be damaged. The additional [REDACTED] is the agreed upon amount per drill site. If, after the road is used, it is determined to be longer or wider than this number we will adjust the payment accordingly.

Our drilling permits should be issued in the next six weeks and drilling should commence within 30 days. Please call me at the above listed numbers if you have any questions.

Sincerely,

Tony Markve  
Vice President, SingleTree Resources
