Rule 901.e. may require a sensitive area determination be performed. If this determination is performed the data is to be submitted with the Form 2A.

Is this a sensitive area: ☒ No ☐ Yes Was a Rule 901.e. Sensitive Areas Determination performed: ☒ No ☐ Yes

Distance (in feet) to nearest surface water: 527, water well: 1796, depth to ground water: 30

Is the location in a riparian area: ☒ No ☐ Yes Was an Army Corps of Engineers Section 404 permit filed ☒ No ☐ Yes

☒ No ☐ 0-300 ft. zone ☐ 301-500 ft. zone ☐ 501-2640 ft. zone

If the location is within a Rule 317B Surface Water Supply Area buffer have all public water supply systems within 15 miles been notified: ☒ No ☐ Yes

15. Comments:

Distance to nearest building, public road, & railroad is greater than 1 mile. Nearest surface water 527' SE is a low area that was dry at time of observation. Nearest water well 1796' SE is an abandoned monitoring well; Receipt #0048281, Permit #48281-MH with a depth of 39' and a static water level of 30.5. The reference area is on undisturbed ground immediately adjacent to and East of the pad location as shown in the location photo facing East. Existing equipment: 1 well, 2 separators, 1 VOC, 12 oil tanks, 1 gas pipeline, 4 3-phase flowlines, 2 EFM, 2 water vaults, & 5 water tanks. Totals with proposed equipment listed in 3.1. Using existing access roads. The proposed disturbance shown on the location drawing has been edited to reflect prior disturbance at this location, which is why it shows as 4 acres. The actual disturbance due to construction of this facility will only be 2 acres, which is consistent with the signed SUA for this location, which is attached to the permit for the associated well.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.

Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR- 038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls.
