Dave,

Based on review of the information provided in the Pond Closure Report, COGCC agrees with the closure request and no further action is required. A copy of the signed Form 27 is attached for your records. The associated remediation project #7446 (document #1761357) was changed to closed status in the Colorado Oil & Gas Information System (COGIS). The pit facility ID #119077 was also changed to closed status in COGIS.

Thank you for providing the detailed documentation to verify proper closure of the evaporation ponds.  
Sincerely,

John Axelson, P.G.  
Environmental Protection Specialist, Northeast Region  
Colorado Oil & Gas Conservation Commission
