Storm Water/Erosion Control	KEC constructs well pads, roads, pipelines, and related facilities related to Exploration and Production (E&P) activities. This Master SWMP is intended to address stormwater management for any and all of these sites within this Master SWMP's Permit Coverage Area.
Material Handling and Spill Prevention	KEC operates certain natural gas production wells in Rio Blanco County Colorado that are subject to SPCC planning requirements because they have oil storage capacity greater than 1,320 gallons (approx. 31 bbl). For those wells that meet or exceed the threshold storage quantities (referred to henceforth as the "SPCC wells") KEC is required to develop and implement an SPCC Plan. This field-wide SPCC Plan has been developed for the KEC SPCC wells that together are referred to as the Rio Blanco County Well Sites, Colorado in response to the regulations listed above.
