SUNDRY NOTICE

Submit original plus one copy. This form is to be used for general, technical and environmental sundry information. For proposed or completed operations, describe in full on Technical Information Page (Page 2 of this form.) Identify well or other facility by API Number or by OGCC Facility ID. Operator shall send an informational copy of all sundry notices for wells located in High Density Areas to the Local Government Designee (Rule 603b.)

5. DESCRIBE PROPOSED OR COMPLETED OPERATIONS

OXY USA Inc. (Oxy) has completed reclamation of the above-mentioned reserve pit. As agreed to in the Oxy and COGCC August 22, 2012 Legacy Pit Closure meeting, the COGCC requested withdrawal of sundry 2221276 and 2216381 and requested an email documenting Oxy's closure activities to date. Therefore, Oxy considers sundry notices 2221276 and 2216381 as withdrawn from their and COGCC records. Oxy submitted the requested email on September 9, 2012 providing the addition information. The COGCC responded via email on October 22, 2012 requesting that Oxy place the email documentation on a new sundry notice and submit this information for reserve pit closure. Oxy is providing the COGCC with the the following reserve pit closure documentation for the above referenced location.

Closure of the Stites 20-8 reserve pit is in compliance with the COGCC 1000 Series Rules, specifically 1003.d (Drilling Pit Closure), which requires that COGCC Table 910-1 concentration levels are met.

Please note that multiple sundry and/or email and meeting correspondence occurred between Oxy and the COGCC between 2010 and 2012. Oxy attempts to capture in this email, the associated correspondence and resolution with the ultimate goal being to provide adequate closure documentation for the Stites 20-8 reserve pit.

Oxy submitted two Sundry notices both requesting Stites 20-8 reserve pit closure. The first sundry was submitted on 8/25/10 and approved by the COGCC on 12/12/11 (reference COGCC document number: 2221276). The second sundry was later submitted on 9/20/11 at the request of the COGCC where some sundry (tech page 2) information was updated (reference COGCC document number: 2216381). Oxy was not aware that the original sundry (2221276) would later be approved in December 2011. The COGCC then proceeded with reviewing the second sundry (2216381) also not aware that the original sundry (2221276) had been approved.

As part of the review of the second sundry, the COGCC requested additional information and subsequently a withdrawal of the sundry (reference COGCC document numbers: 2229473, 2229495). In accordance with the 2012 annotated sundry notice(s) that the COGCC sent back to Oxy requesting further information and the Legacy Pit Closure meeting held on 08/22/2012, Oxy is submitting the attached documentation as information requesting to close the Stites 20-8 reserve pit, under COGCC document number 2216381. Included in this sundry's reserve pit closure documentation:

- Updated Stites 20-8 reserve pit sampling narrative
- Updated Stites 20-8 reserve pit tabulated data
- Updated sampling map
- Supporting lab analytical data package reflecting the tabulated data

See Attached Narrative

Complete lab results: see Doc 2230852
9/18/2012

Based on review of information presented on data presented it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.

Stites 20-8 Reserve Pit (Location ID: 334519; Document #: 2216381) Reclamation and Closure Sampling Narrative

This is Oxy's updated Stites 20-8 reserve pit sampling narrative. This is being provided in support of closure documentation, specifically the Sundry notice submitted on 10/04/2011 (reference COGCC document number: 2216381). The narrative details what closure, and background samples were taken, where they were taken and for what purpose.

Post Reclaim Samples 11/04/2009 (L430535, Accutest T41652)

- Oxy removed the pit liner and mixed the pit bottom with a back hoe. The initial post reclaim sample was a five point composite sample of the pit bottom, which was consistent with practices conducted at time of closure (2009). All five initial post reclaim samples were collected within a 5'x5' area. Oxy speculates that initial post reclaim samples were concentrated in this area as this was the low point of the pit and theoretically any contamination would have settled in this area. Also, it was typical of reserve pits to be segregated into a fluids area and a solids area. The 5'x5' area should correspond to the fluids area. The initial post reclaim samples were taken between 0-12 inches at the pit bottom which was approximately 10' feet below the pad surface. The initial post reclaim samples are represented in the tabulated data spreadsheet in the first and second columns and labeled as "Post Reclaim" for Sample Type on the attached table. Note that there are two "Post Reclaim" sample columns; this is due to that fact that two separate labs were used to process the samples. Lab sample L430535 analyzed the majority of the 910-1 constituents and the Accutest T41652 lab sample analyzed Barium and Boron. The initial post reclaim sample date was 11/04/2009 and the Sample ID from the data tabulation is Stites 20-8 Post Rec 0-12 IN. These samples are shown on the Sampling map as black dots and are referenced in the legend as Post Reclaim Samples (11/04/2009). The lab data reports for these samples are attached. The sample values can be found on lab report L430535 on pages 2 and 3 and on Accutest T41652 pages 5 and 6 as sample ID Stites 20-8 Post Rec.
- Initial Post Reclaim values showed elevated concentrations for SAR, pH, Arsenic (As), Barium, and Boron.

Background Samples 11/04/2009 (L430535)

- An initial five point composite background sample was collected from various undisturbed locations around the pad, which was consistent with practices conducted at time of closure (2009). All initial background samples were collected at various depths between 0-6 inches. The background samples are represented in the tabulated data spreadsheet in the third column and labeled as "Background" for Sample Type on the attached table. The background sample date was 11/04/2009 and the Sample ID from the data tabulation is Stites 20-8 BG 0-6 IN. These samples are shown on the Sampling map as Fuchsia dots and are referenced in the legend as Background Samples (11/04/2009). The lab data report for these samples is attached. The sample values can be found on lab report L430535 on page 4 as sample ID Stites 20-8 BG.
- Initial background samples were tested only for EC, SAR, pH, and As, as was consistent with practices conducted at time of closure (2009). All analytes were found to be below the COGCC's table 910-1 allowable concentrations.

Fill Samples 11/30/2009 (L434452, T43419)

- Oxy backfilled the pit with stockpiled native clean material to pad grade (6-8 feet). A five point composite sample was taken of the fill and analyzed only for the analyte exceedances found in the initial post reclaim samples. Samples were collected between 0-12 IN. The fill material was also serving as a cap for the elevated values of SAR and pH found in the initial post reclaim values. The fill material was sampled for Boron and Barium to possibly justify burying the contamination below 6-8 feet of clean fill. The fill material was found to be within the COGCC Table 910-1 allowable concentrations. As Boron and Barium are not contaminants that are allowed to be buried only, Oxy decided to wait for spring and better weather to re-sample the pit bottom. The fill samples are represented in the tabulated data spreadsheet in the fourth and fifth columns and labeled as "Fill" for Sample Type on the attached table. Note that there are two "Fill" sample columns; this is due to the fact that two separate labs were used to process the samples. Lab sample L434452 analyzed for SAR and pH and the Accutest T43419 lab sample analyzed Barium and Boron. The fill sample date was 11/30/2009 and the Sample ID from the data tabulation is Stites 20-8 Fill 0-12 IN. These samples are shown on the Sampling map as yellow dots and are referenced in the legend as Fill Samples (11/30/2009). The lab data reports for these samples are attached. The sample values can be found on lab report L434452 on page 2 and on Accutest T43419 pages 5 and 6 as sample ID Stites 20-8 Fill
- Fill samples were tested only for SAR, pH, Barium and Boron, as these were the only analyte exceedances found in the initial post reclaim samples. All analytes were found to be below the COGCC's table 910-1 allowable concentrations.

Post Reclaim re-sample 05/06/2010 (L458028)

- Based on the initial post reclaim composite sample Barium and As analyte exceedances found, Oxy mobilized an excavator to dig back down to the low point of the mixed pit bottom to collect a 5 point composite post reclaim re-sample (05/06/2010). As there were no other analyte exceedances found in the initial post reclaim samples, Oxy re-sampled for Barium and As only. Oxy suspected the elevated Barium concentration to be either a lab error or sampling error. Boron was not re-sampled for, as samples were taken after the 2008 amended rules went into effect, the COGCC does not require pit contents to meet a Boron MCL. The Post Reclaim re-sample is represented in the tabulated data spreadsheet in the sixth column and labeled as "Post Reclaim" for Sample Type on the attached table. The Post Reclaim re-sample date was 05/06/2010 and the Sample ID from the data tabulation is Stites 20-8 Post Rec 6-8 FT (Re-sample). These samples are shown on the Sampling map as green dots and are referenced in the legend as Post Reclaim re-samples (05/06/2010). The lab data report for these samples is attached. The sample values can be found on lab report L458028 on page 2 as sample ID, Stites 20-8 Post Rec 6-8 FT.
- Sample results yielded an elevated concentration of As, but Barium was found to be within the COGCC's table 910-1 allowable concentrations.

Background Samples 07/20/2010 (L469802)

- In effort to clear Post Reclaim As concentrations, Oxy collected four random grab samples from native undisturbed areas around the pad at depths of 0-6 inches (07/20/2010). The Background samples are represented in the tabulated data spreadsheet in the 7-10th columns and labeled as "Background" for Sample Type on the attached table. The Background sample date was 07/20/2010 and the

Sample ID's from the data tabulation are Stites 20-8 BG-N 0-6 IN, Stites 20-8 BG-E 0-6 IN, Stites 20-8 BG-S 0-6 IN, Stites 20-8 BG-W 0-6 IN. These samples are shown on the Sampling map as blue dots and are referenced in the legend as Background Samples (07/20/2010). The lab data report for these samples is attached. The sample values can be found on lab report L469802 on pages 2-5. Sample ID's in the lab report are; Stites 20-8 BG-N 0-6 IN, Stites 20-8 BG-E 0-6 IN, Stites 20-8 BG-S 0-6 IN, Stites 20-8 BG-W 0-6 IN.

- This sampling effort yielded background As concentrations above those found in Post Reclaim samples (11/04/2009 & 05/06/2010).

In conclusion, this pit has been closed and meets both the COGCC 900 series and 1000 series rules for pit closure. All analyte concentrations were found to be below COGCC table 910-1 allowable concentrations, or were found to be below native background levels. Oxy will continue to monitor this site to ensure that the pit cap has not subsided and for stormwater compliance until final pad reclamation has occurred.

Attachment A
List of Analytes with QC Qualifiers

Sample Number	Work Group	Sample Type	Analyte	Run ID	Qualifier
L430535-01	WG449893	SAMP	Toluene	R990589	J
	WG449557	SAMP	Chromium, Hexavalent	R986828	J
	WG449246	SAMP	Mercury	R988748	J
	WG449368	SAMP	Fluorene	R986669	J

Attachment B
Explanation of QC Qualifier Codes

Qualifier	Meaning
J	(EPA) - Estimated value below the lowest calibration point. Confidence correlates with concentration.

Qualifier Report Information

ESC utilizes sample and result qualifiers as set forth by the EPA Contract Laboratory Program and as required by most certifying bodies including NELAC. In addition to the EPA qualifiers adopted by ESC, we have implemented ESC qualifiers to provide more information pertaining to our analytical results. Each qualifier is designated in the qualifier explanation as either EPA or ESC. Data qualifiers are intended to provide the ESC client with more detailed information concerning the potential bias of reported data. Because of the wide range of constituents and variety of matrices incorporated by most EPA methods, it is common for some compounds to fall outside of established ranges. These exceptions are evaluated and all reported data is valid and useable unless qualified as 'R' (Rejected).

Definitions

- Accuracy - The relationship of the observed value of a known sample to the true value of a known sample. Represented by percent recovery and relevant to samples such as: control samples, matrix spike recoveries, surrogate recoveries, etc.
- Precision - The agreement between a set of samples or between duplicate samples. Relates to how close together the results are and is represented by Relative Percent Difference.
- Surrogate - Organic compounds that are similar in chemical composition, extraction, and chromatography to analytes of interest. The surrogates are used to determine the probable response of the group of analytes that are chemically related to the surrogate compound. Surrogates are added to the sample and carried through all stages of preparation and analyses.
- TIC - Tentatively Identified Compound: Compounds detected in samples that are not target compounds, internal standards, system monitoring compounds, or surrogates.

SAMPLE INSPECTION FORM

Accutest Job Number: T43419 Client: Oxy Date/Time Received: 12/2/09 0900
 # of Coolers Received: 1 Thermometer #: 1P-1 Temperature Adjustment Factor: +0.4
 Cooler Temps: #1: 15.6 #2: _____ #3: _____ #4: _____ #5: _____ #6: _____ #7: _____ #8: _____
 Method of Delivery: ☒ **FEDTEX** ☐ UPS ☐ Accutest Courier ☐ Greyhound ☐ Delivery ☐ Other
 Airbill Numbers: _____

COOLER INFORMATION

- ☐ Custody seal missing or not intact
- ☐ Temperature criteria not met
- ☐ Wet ice received in cooler

CHAIN OF CUSTODY

- ☐ Chain of Custody not received
- ☐ Sample D/T unclear or missing
- ☐ Analyses unclear or missing
- ☐ COC not properly executed

SAMPLE INFORMATION

- ☐ Sample containers received broken
- ☐ VOC vials have headspace
- ☐ Sample labels missing or illegible
- ☐ ID on COC does not match label(s)
- ☐ D/T on COC does not match label(s)
- ☐ Sample/Bottles rcvd but no analysis on COC
- ☐ Sample listed on COC, but not received
- ☐ Bottles missing for requested analysis
- ☐ Insufficient volume for analysis
- ☐ Sample received improperly preserved

TRIP BLANK INFORMATION

- ☐ Trip Blank on COC but not received
- ☐ Trip Blank received but not on COC
- ☐ Trip Blank not intact
- ☐ Received Water Trip Blank
- ☐ Received Soil TB

Number of Encores? _____
 Number of 5035 kits? _____

Dear Mr. Fischer,

As requested by Linda Spry O'Rourke via email on October 22, 2012, Oxy is resubmitting the reserve pit closure documentation as part of the attached sundry notice. Oxy is providing this document electronically and has not sent a hard copy to the Denver office. If a hard copy is required, please let me know and I can provide one.

Please let Daniel or me know if sufficient information has been provided to close the reserve pit or if you require additional information.

Thank you,

Blair Rollins
Support Contractor for Oxy Regulatory Department
