**Inspector Comment:**

Inspection related to pit closure - Rem #7364 and corrective actions required by NOAV #200358023. Observed pit had been cleaned out. Liner had been removed, pit was dry and there was no evidence of any remaining oily soil in pit at time of inspection. Approximately 8-10 cu yds of oily waste was stockpiled pending load out and disposal. Approximately 15-20 cu yds clean material to be used for backfill. John Axelson gave Magpie verbal approval to proceed with pit backfill. Magpie still required to submit soil sample location diagram and disposal documentation to receive closure for related pit, remediation project and NOAV.
