LGD	<p>1. The Applicant will obtain all necessary permits, including Building Permits and Access Permits, as appropriate.</p> <p>2. A Grading Erosion and Sediment Control Plan and report must be submitted for each oil and gas facility. As the disturbed area for this well exceeds 1 acre, collateral to guarantee the BMPs will be instituted prior to issuance of the GESC Permit. The GESC Permit must be issued prior to any grading related to facility construction.</p> <p>3. A traffic report must be submitted to the County before issuance of an Access Permit. The report must specify the volume, type, and size of truck traffic used in drilling, completion and production. Included in this report, the applicant must provide a detailed map depicting all County roads intended to be used for truck traffic ingress and egress to the facility. The roadway condition and existing traffic volumes of each of the roadways must be specified in the report. Any damage to a County road resulting from the facility construction or operation will be the responsibility of the Applicant.</p> <p>4. An Oversize Moving permit is required for transporting drilling rigs or any other oversize and overweight vehicles on any County roadway.</p> <p>5. In the event of any encroachment of a FEMA or County designated floodplain, a Floodplain Development Permit will be required. Prior to issuance of this permit, an engineering analysis must be submitted evaluating the impact of this encroachment on the 100 year floodplain.</p> <p>Arapahoe County has the following suggestions:</p> <p>The Applicant and/or contractors are responsible for dust control and mitigation on unpaved roads, the well pad, and associated facilities.</p> <p>The Applicant will have light directed downward during the drilling phase.</p> <p>The Applicant will use a closed-loop system.</p> <p>The Applicant will be responsible for noxious weed control from the drilling phase to the closure of the well or associated facility.</p> <p>The Applicant will submit a complaint-based Noise Mitigation Plan to Public Works and Development prior to construction of the facility.</p> <p>The Applicant and contractors will work with applicable school district(s) to minimize conflicts with school buses.</p>	2/4/2013 9:49:15 AM

Site Specific	<p>ConocoPhillips Groundwater Monitoring Program</p> <p>ConocoPhillips has adopted the Colorado Oil and Gas Association (COGA) voluntary groundwater testing program to establish baseline groundwater quality conditions around new oil well locations in their leased area. The sampling program will allow the company (ConocoPhillips) to evaluate the groundwater conditions before drilling a well and also to monitor water quality afterward.</p> <p>The program will be in accordance with the guidance set forth in the Voluntary Baseline Groundwater Quality Sampling Program last updated on November 15, 2011. Under the sampling protocol, water samples would be collected from the two closest groundwater sources with reasonable access. The sample points, permitted or registered wells, would be located within ½ mile of the proposed well surface location.</p> <p>Sampling will be conducted based on the landowner granting access to the well location and agreeing to have the laboratory analytical results submitted to COGCC for posting to a database viewable by the public.</p> <p>Samples will be analyzed for the constituents listed in Table 1 of the Groundwater Sampling and Analytical Program.</p>
