Oil and Gas Location Assessment☐ New Location ☒ Amend Existing Location Location#: 311910

Submit original plus one copy. This form is to be submitted to the COGCC prior to any ground disturbance activity associated with oil and gas development operations. This Assessment may be approved as a standalone application or submitted as an informational report accompanying an Application for Permit-To-Drill, Form 2. Approval of this Assessment will allow for the construction of the below specified location; however, it does not supersede any land use rules applied by the local land use authority. This form may serve as notice to land owners and other interested parties, please see the COGCC web site at <http://colorado.gov/cogcc/> for all accompanying information pertinent to this Oil and Gas Location Assessment.

14. Water Resources:

Rule 901.e. may require a sensitive area determination be performed. If this determination is performed the data is to be submitted with the Form 2A.

Is this a sensitive area: ☒ No ☐ Yes Was a Rule 901.e. Sensitive Areas Determination performed: ☒ No ☐ Yes

Distance (in feet) to nearest surface water: 475, water well: 1750, depth to ground water: 200

Is the location in a riparian area: ☒ No ☐ Yes Was an Army Corps of Engineers Section 404 permit filed ☒ No ☐ Yes

Is the location within a Rule 317B Surface Water Supply Area buffer zone:

☒ No ☐ 0-300 ft. zone ☐ 301-500 ft. zone ☐ 501-2640 ft. zone

If the location is within a Rule 317B Surface Water Supply Area buffer have all public water supply systems within 15 miles been notified: ☐ No ☐ Yes

15. Comments:

This is a refiling of a previous permit which was issued API # 05-067-09560. This well will be located on an existing well pad. Depth to ground water varies in this area and no specific information is available for this tract because there are no water wells on fee lands within 1/2 mile. Colorado Division of Water Resources Aquamap shows depths of water wells in the general area to be between 170 -255 feet in depth.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.

Construction	<p>The IGE 118 well location will be expanding to the North and West of the existing Ute T #2 well into a relatively flat, non-irrigated field. Very little vegetation will be removed. Dirt from the excavation of the reserve pit will be stockpiled until interim reclamation.</p> <p>Straw wattles will be placed around the perimeter of the well pad during construction operations where appropriate to control runoff and prevent sediment from flowing beyond the perimeter of the previously disturbed area.</p> <p>All equipment will be painted with a uniform, non-reflective paint that is darker than the adjacent landscape.</p> <p>Any disturbed area that is outside the permanent well pad will reseeded with a weed-free seed mixture consistent with the surrounding area.</p> <p>Re-seeding will be done via drill seeding in flat areas and broadcast seeding on slopes. Reseeding will be done in spring or summer.</p> <p>Elm Ridge will control all noxious weeds as identified by the La Plata County weed technician.</p> <p>Elm Ridge will monitor the site after reclamation and spray for weeds where necessary. Methods of control will be pursuant to recommendations from the LaPlata County weed control technician.</p>
