<b>FACILITY/ SITE INFORMATION</b>	<b>Patterson 303 Parachute</b>	<b>GPS Information</b>
Site Location Name:	<b>PH-21</b>	Degree W: 107 995289
Emergency Notification Number:	970-625-8095 Garfield Dispatch	Degree N: 39.426052
Site Phone Number:	303-353-5354	Elevation: 6301'
Legal Description:	Qtr SE 1/4 Qtr NE 1/4 Sec 21 Twn 7S Rng 95W	
Mailing Address:		

### Emergency Directions to the site, rig supervisors, and emergency evacuation plan:

**Emergency Directions:** ~ 6.2 miles from the town of Parachute to the PH-21 location. Starting in Parachute travel over I70 on CR308 ~3.5 miles and turn left (east) at the edge of CR303 where it becomes a lease road. Traveling in a southeasterly direction, for ~2 miles follow the Patterson 303 rig signs to the PH-21.

**(Encana Rig Supervisors: Charlie Brown and Michael Olsen.) Evacuation Plan:** Notify Garfield Dispatch. In the event of any natural upset, such as wild fire, be prepared for emergency response. First identify the source and prepare to evacuate using vehicles if safe to do so. If primary vehicle travel route to PH-21 is blocked, determine if staying on location is the safest response. If evacuation is imminent and vehicle travel too high a risk, travel by foot away from the danger to a secure pre-selected muster location. PJ-21 If possible, prior to evacuation, secure the well by installing TIW valves in the casing or drill pipe, closing and manually locking down the pipe rams, and closing the annular preventer. The final step before evacuation if safe to do so is to shut down all rig power.
