NOTICE OF HEARING
BEFORE THE OIL AND GAS CONSERVATION COMMISSION OF THE STATE OF COLORADO
CAUSE NO. 31
IN THE MATTER OF THE INVESTIGATION TO TAKE MEASURES TO PREVENT THE WASTE OF OIL AND GAS IN THE MASTERS FIELD, WELD AND MORGAN COUNTIES, COLORADO.
TO ALL INTERESTED PERSONS AND TO WHOM IT MAY CONCERN:
NOTICE IS HEREBY GIVEN, that the Oil and Gas Conservation Commission of the State of Colorado, upon its own motion, has set the above-entitled matter down for hearing on:
DATE: January 12, 1955
TIME: 10:00 A.M.
PLACE: Room 704, State Capitol Annex, 14th Avenue and Sherman Street, Denver, Colorado

The Commission has heretofore issued its Order No. 31-2 (Emergency), which provides in part that the operators and owners of all wells producing oil or both oil and gas from the "D" sand of the Masters Field shall not produce oil from any one well in an amount, during any one month, exceeding a daily average of One Hundred Twenty-five (125) barrels; and shall not produce gas from any one well in an amount, during any one month, exceeding a daily average of One Hundred Fifty Thousand (150,000) cubic feet.

The Commission has instituted this proceeding to take measures to prevent the waste of oil and gas in the "D" sand of the Masters Field in Weld and Morgan Counties, Colorado, and all operators and owners of working interests, and all persons interested in the said field are hereby required to appear at the hearing as set forth above, and to show cause, if any they have, why the Commission should not enter all appropriate orders to prevent the current waste of oil and gas in the operation of said field, and, in particular, why the Commission should not enter an order fixing a gas-oil ratio appropriate for said field; or why an order should not be entered reducing the daily production from the field in order to reduce the rate of reservoir pressure drop; or why an order should not be entered requiring that there be determined the amount of oil each well in the field can produce without waste, in accordance with sound engineering practices; or why such other orders or combinations of orders should not be made to prevent the present waste in the operation of said field. All operators and owners of working interest, and all persons interested in said field are hereby required to present to the Commission the following engineering data for the "D" sand reservoir:

1. Physical properties of the reservoir, including the average porosity, permeability, and oil and interstitial water saturations.
2. Structural features of the reservoir, including dip of producing zone, cross sections, water-oil and gas-oil contacts, ratio of gas-cap volume to oil-zone volume, net effective oil pay thickness, and structure maps.
3. Characteristics of the reservoir fluids.
4. Reservoir pressures and temperatures, including isobaric maps, if available.
5. Statistical data, including production of oil, water, and gas, volume of gas flared or vented, gas-oil ratios, number of wells and status thereof, completion methods, proven oil acreage, both developed and undeveloped, depletion rate of reservoir, and rate of water encroachment.
6. General reservoir mechanics, including rate and effectiveness of gas-cap expansion drive and water drive, effectiveness of segregation or gravity drive, and material balance calculations.
7. Recommendations to the Commission, and reasons therefor.

It is suggested that operators confer with each other so that such data as is hereby sought may be available and presented with respect to the field as a whole, rather than with respect to particular leases producing therefrom.
