Distance to nearest railroad is greater than one mile. Nearest surface water 115' SE is a low area. Nearest water well 1735' SE is an irrigation well; Receipt #9059774, Permit #7008-R with a depth of 70' and a static water level of 23'. It is where the CDWR shows water well permit 277349 to be. The reference area is on ground immediately adjacent to and Esat of the tank location as shown in the location photo facing East. Location the production facility for the proposed eight well pad containing proposed Lonewolf B02-65HC, Wolfpack B02-66-1HN, Wolfpack B02-65HN, & Wolfpack B02-65-1HN on the North end of the pad, and the proposed Wolfpack B02-62-1HN, Wolfpack B02-63-1HN, Wolfpack PC B03-63-1HN, & Wolfpack B02-64-1HN on the South end of the pad, along with the existing equipment for the existing Bucklen 1-2 and Bucklen B2-12 wells. Existing equipment: 1 separator, 1 VOC, 1 oil tank, 1 gas pipeline, 2 3-phase flowlines, 1 water vault, and the Bucklen 1-2 wellhead. General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR- 038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
