Figure 1 is a line graph showing the retention time (Rt) of various compounds (labeled 1 through 10) as a function of the elution volume (V_e) in milliliters. The x-axis represents V_e (ml) from 0 to 200, and the y-axis represents Rt (min) from 2 to 2000. The graph shows several peaks, with the most prominent ones labeled 1 through 10. A dashed line indicates the 2.68 SS (Standard Deviation) level.
