Subject: Sarchet X20-02 API 05-123-14952

Hello Diana,

While working on the above well for WBI we have discovered mechanical issues and would like to plug the well as follows:

1. Pump 25 sacks (5 bbls) plug at 7256' (depth tagged when running bit and scraper). Tried running a retrievable bridge plug and stacked out at 2000'. Have been trying to dress casing up yesterday and today
2. Cut casing off at 5000'.
3. Pump 100 sack stub plug (where casing has been cut) WOC and tag
4. Pump 100 sack open hole plug at 3000' WOC and tag
5. Pump 950' to surface and top off as needed

Thanks
Erich Zwaagstra
