Ann,

A new Form 2 and Form 2A may not be required if the location of the Badger Creek 22-32 is moved a short distance due to the above ground utility. COGCC will determine the need for a new permit application based on the coordinates of the new location and distance from the original location. If the existing application can be used, we will update the Form 2 and Form 2A with the new location, distances, and new attachments that you provide.

Please feel free to call me with questions or concerns.

Best Regards,

—

John Noto, P.G.  
Oil and Gas Location Specialist  
Colorado Oil and Gas Conservation Commission

Gentlemen:

Attached please find an updated certified plat for the Badger Creek 22-32, wherein the Operator moved the location to comply with Rule 603.a. Please review the coordinates of the new location and let me know if the COGCC will allow the existing Form 2 and 2A to proceed, or if new permit applications will be required.

The Operator is still working with the adjacent mineral lease owner to obtain waivers for this well and the 22-33. I will provide those waivers as soon as available.

If you should have any questions or require additional information, please do not hesitate contacting me. Thank you for all your assistance in these matters.

Respectfully,

**Ann Stephens**

John,

Got your message...thanks. I think the information below, which I sent Bill Yokley last Friday, is what you might be looking for. I am still on a conference call so in case I don't speak to you before 5 today, please send an email if you are still in need of more footages or data and I will get on it first thing in the morning. Have a great evening!

Respectfully,

a

Good morning Ann,

The change of SHL is acceptable.

Issue: you will have to supply updated footages for both the form 2 and form 2A, i.e. distance to nearest well, property, utility, ...etc.

Please email those footages to me and I will insert and process as necessary.

Thanks,

Bill
