☒ No ☐ 0-300 ft. zone ☐ 301-500 ft. zone ☐ 501-2640 ft. zone

If the location is within a Rule 317B Surface Water Supply Area buffer have all public water supply systems within 15 miles been notified: ☐ No ☐ Yes

15. Comments:

The distance to the nearest surface water is actually the distance to the nearest ephemeral stream/ dry gulch. A search of the DWR database found no water wells in T1S, R104W. A consultation with DPW Land Use Specialist, Jacob Davidson, was conducted. The email chain of that consultation is attached. He confirmed that KGH can continue to use previously approved wildlife BMPs. KGH concurs with these recommendations and agrees to implement the BMPs. Operator intends to use closed loop system if available, otherwise a reserve pit may be required.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
