Brianne,

I have reviewed the referenced Form 2A and I have two changes I'd like to make to it.

1) A review of the water well permit for the nearest water well (Permit #16462) indicates that depth to the bottom of the well is 93 feet while the depth to groundwater is 20 feet. Therefore in the Water Resources section of the Form 2A I would like to change the depth to ground water from 93 feet to 20 feet.

2) Due to the presence of potentially shallow groundwater and the proximity of the nearby Sheep Draw to the east of the oil and gas location, I'd like to change the Water Resources section to indicate YES this is a sensitive area.

If you have any questions, please feel free to contact me.
