Kaylene,

I have completed my review of the referenced Form 2A and I have a few comments.

- 1) Per our telephone conversation this morning, I will remove the listing of one drilling pit from the Facilities section of the Form 2A.
- 2) In the Construction section, the date planned for construction to commence must be in the future. Currently it is listed as 6/3/13. Also, because the current and future land use for this location is Crop Land, per COGCC Rule 1003b interim reclamation shall occur no later than 3 months after such operations. Therefore, please provide me with an updated construction and interim reclamation dates and I will change it on the Form 2A.
- 3) In the Comments section you have indicated that drilling mud and cutting will be remediated prior to burial onsite. I would like to amend that comment to include they should be remediated to COGCC Table 910-1 standards.
- 4) The COGA Voluntary Baseline Groundwater Sampling Program is listed on the Form 2A as a BMP. As of May 1, 2013, groundwater testing must be in accordance with COGCC Rule 609. I will remove the groundwater sampling BMP with your approval.

Please feel free to contact me if you have any questions. Respectfully.

—
