

## PLANNING BMP's

- \* Share/consolidate corridors for pipeline ROWs to the maximum extent possible.
- \* Locate roads outside of drainages where possible and outside of riparian habitat.
- \* Avoid constructing any road segment in the channel of an intermittent or perennial stream
- \* Minimize the number, length, and footprint of oil and gas development roads
- \* Use existing roads where possible
- \* Place roads to avoid obstructions to migratory routes for wildlife, and to avoid displacement of wildlife from public to private lands.
- \* Maximize use of long-term centralized tank batteries to minimize traffic
- \* Maximize use of remote telemetry for well monitoring to minimize traffic

## PRODUCTION/RECLAMATION BMP's

Use only certified weed-free native seed in seed mixes, except for non-native plants that benefit wildlife

WPX Energy will use certified, weed free grass hay, straw, hay or other mulch materials used for the reseeding and reclamation of disturbed areas.

Install exclusionary devices to prevent bird and other wildlife access to equipment stacks, vents and openings.

Reduce visits to well-sites through remote monitoring (i.e. SCADA) and the use of multi-function contractors.
