Amber,

Please enter the attached Form 27 and this email, and link them to :

Pit Facility ID # 295547

Location ID # 311676

API # 045 15376

Then close the project with Form 27 A and include the following comment at the end of the form:

*Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.*

•

Finally, please copy all in the distribution list with the Form 27 Remediation Project Number.

Thanks,

Diane,

The Project will be entered (a REM # will be generated) and closed.

I have already changed the status of the pit in COGCC database. It appears now as closed (CL), with a comment indicating that remediation was conducted and confirmation samples analytical results were below Table 910-1 values.

Please consider this email as a confirmation that I have closed the project and that No Further Action is Required regarding the closure of the Dever A pit.

Please let me know if I can be of further assistance and/or if you have questions or comments.

Thanks,

Carlos

Hi Gentlemen,

As we previously discussed in our meeting earlier this year, Antero had one final pit at the Dever A Pad which was physically closed in early 2009 but was not closed through the COGCC. Historic contamination was identified in our earlier 2013 sampling at the Dever A pad, and Antero subsequently conducted remediation activities at the site. The project was slower than we originally anticipated due to cold weather followed by wet weather, but the area has now been excavated, at the supervision of Mark Mumby at HRL, and sampling confirms compliance with Table 910 Standards (as more fully described in the attached Form 27).

I trust you will find everything in order, but if you have any questions please do not hesitate to contact me.

Carlos, I know you have moved on to greener pastures, but I thought I'd include you here since you were so involved with the entire project!

We really appreciate all of your assistance!

Thanks,

Diane
